[\(24HRS LIMITED OFFER\)](#)

Despite the fact that there is no recognized treatment for herpes, Blisterol promises to work by attacking the problem's source using all-natural substances. Because it tackles the problem's source, Blisterol is said to "eradicate herpes from your system permanently."

Here is how the manufacturer of Blisterol describes its effects:

“Blisterol. The single most potent remedy with the ability to eradicate herpes and keep you free of cold sores for life... You cannot locate a herpes-killing solution with all of these advantages. Simply because it does not exist.”

In addition, Blisterol is said to treat both oral and genital herpes. Whether you have cold sores and blisters around your mouth or herpes symptoms around your genitalia, Blisterol may supposedly erase herpes from your body.

To eliminate herpes, just take one dose of Blisterol everyday. The natural components begin working immediately to eradicate the underlying cause of herpes, allowing you to prevent herpes symptoms permanently.

How does Blisterol function?

Blisterol eliminates the fundamental cause of oral and genital herpes as part of a "soft skin revitalization hack."

According to the official website, "a herpes expert from Denver, Colorado" created the supplement. This herpes expert is "a doctor with good intentions" who was compelled to leave practice after discovering a treatment for herpes.

Large pharmaceutical corporations opposed the doctor's herpes treatment because it posed a danger to their \$5 billion per year herpes pill business.

Ben Waller is the name of the herpes physician. Ben used to treat his patients with Acyclovir or Abreva, two of the most widely prescribed anti-herpes drugs in the world.

One day, though, Ben discovered that his Acyclovir or Abreva prescriptions were ineffective: they just increased people's reliance on large pharmaceutical corporations. Large pharmaceutical corporations might continue to benefit from herpes patients while disregarding the virus' underlying cause.

"I learned that an issue that seemed to be beyond our control was in fact entirely within our control. And the multibillion-dollar herpes business that is profiting off the most terrible period of your life, rather than healing you..."

Ben was concerned about the adverse effects of his anti-herpes medicine. For instance, Acyclovir may harm your kidneys and intestinal bacteria.

Blisterol works differently. The solution promises to employ all-natural components to eradicate the herpes

virus' fundamental cause, allowing you to prevent any future genital and oral herpes symptoms forever.

Does Blisterol Cure Herpes?

Herpes has no recognized treatment. However, the manufacturers of Blisterol promise that it would permanently eradicate herpes and all of its symptoms.

Then, does Blisterol heal herpes? Does the recipe promise to completely eradicate HSV-1 and HSV-2 from the body?

Here are some of the claims made regarding the advantages of Blisterol on its official website:

The manufacturers of Blisterol promote the combination as "the only way to permanently eradicate herpes."

According to the official website, Blisterol is a "soft skin resurrection hack" that will help you to permanently avoid oral and genital herpes.

The manufacturer also claims that the supplement works regardless of how long you've had herpes, stating, "This solution is so potent that it can destroy the herpes simplex virus and flush it out of your system, regardless of how long you've had herpes."

Ben and the Blisterol team assert that large pharmaceutical corporations are aware of a treatment for herpes, but purposefully suppress it to increase profits; according to Ben, the therapy for HSV-1 and HSV-2 "has been known to the herpes business for over nine years."

Ben asserts that his remedy would "achieve total herpes eradication" and provide "lifelong immunity against outbreaks."

Ben asserts that Blisterol "works quickly" and stops herpes from destroying people's life, referring to the composition as a "herpes-killing cocktail."

Ben further says that the solution "may battle the herpes virus from inside," enabling you to remove herpes from your system and stop using Blisterol soon afterwards.

Overall, based on the claims displayed on Blisterol.com, the supplement seems to promise that it can treat herpes completely and erase all traces of the virus from your body for the rest of your life, which was previously considered to be impossible.

Blisterol Adverse Reactions

Traditional treatments for herpes have adverse effects. Acyclovir, for instance, may affect the kidneys and inhibit the function of the gut bacteria.

However, the manufacturers of Blisterol say that using the natural supplement everyday has "absolutely no negative effects." Due to the formula's natural components, you will not encounter any adverse effects.

Instead, the only "side effects" of Blisterol are more energy, improved sleep, and an improved sense of general health.

Blisterol Ingredients

Ben and his colleagues do not initially reveal any of Blisterol's chemicals. Ben wants to keep his formula secret since it threatens the revenues of big pharma.

However, according on the sources given on Blisterol.com, we know that the supplement comprises the following four substances:

Fenugreek is a prominent herb used in alternative medicine. Fenugreek has been used in traditional medicine for centuries, and its putative benefits on testosterone, hunger, inflammation, and cholesterol have made it a popular dietary supplement.

L-Tyrosine: L-tyrosine is a non-essential amino acid. L-tyrosine is created by the body since it is a non-essential amino acid; it is not necessary to consume it. L-tyrosine is essential for the creation of hormones, enzymes, and neurotransmitters.

Saw Palmetto: Like fenugreek, saw palmetto is well recognized for its use in testosterone boosters, prostate supplements, and other male sexual health dietary supplements. The saw palmetto is a native of the southern United States.

Oat Straw is a grass resembling hay that is used in dietary supplements to enhance brain function, reduce feelings of worry and stress, and promote overall health and wellbeing. Some individuals use oat straw as a supplement in capsule form, while others consume it as a tea.

Blisterol seems to have other components. However, these four components are the only ones stated on the official website. Together, these four components are said to eradicate the herpes virus from the body in a matter of weeks.

Blisterol Evaluations: What to Anticipate

The official Blisterol.com website is replete with testimonials from people who have seen major health improvements after only a few weeks of treatment. Numerous individuals have removed cold sores and other herpes symptoms. Numerous individuals feel healthier and happier. Blisterol has allowed some to prevent herpes outbreaks for months or years.

Here are some of the verifiable customer testimonials provided on the Blisterol website:

Ben saw a 25-year-old patient with "the worst case of herpes" he'd ever seen. Ben suggested treating the disease with Blisterol, and she quickly recovered.

Another 32-year-old lady suffered from cold sores, but after using Blisterol, the lesions disappeared quickly.

One client referred to Blisterol as a "miracle from above" since it cured his HSV-2 illness so quickly.

After being diagnosed with HSV-1 and HSV-2 infections a year ago, one client believed she was doomed to a lifetime of disgrace. She tried Blisterol because she was eager to try anything. Today, her herpes virus "looks like a nightmare from the past" since Blisterol has erased her rashes and she has not had a cold sore in many months. This lady considers Blisterol as "the finest choice of my life" because of these results.

According to another client, the herpes breakouts that formerly ruined her life "are now a distant memory" because to Blisterol.

One client referred to Blisterol as "literally a lifeline." After being diagnosed with HSV-1 and HSV-2, the client believed her social life was ended. She discovered Blisterol to be the "only remedy" that worked. It revitalized her within a few days, allowing her to resume her social life.

Another confirmed customer had had weekly outbreaks of herpes cold sores for a whole year. His body was fragile, and his immune system was insufficient to combat the infection. To cure his ailment, doctors gave Acyclovir, but it had "zero impact." Then, after taking one capsule of Blisterol daily, his "issues disappeared." His cold sores, worry, and tension were cured with Blisterol.

Ben and his crew say that favorable testimonials are arriving so rapidly that they cannot be posted on the website. The aforementioned testimonies, according to him, are "only the top of a very vast iceberg." Blisterol has helped individuals eradicate herpes permanently in every region of the nation and the globe. Ben says that "thousands" of individuals have taken the pill to eliminate herpes.

How to use Blisterol

Ben and his colleagues suggest taking one dose (one capsule) of Blisterol daily for many months to eradicate the herpes virus and all associated symptoms permanently.

To enable the mixture to eradicate the herpes virus, just take one capsule of Blisterol daily with a glass of water, at any time.

The longer you use Blisterol, the greater the likelihood that the herpes virus will be eliminated from your system:

One bottle (30 day supply) will remove cold sores and other obvious herpes signs. Three bottles (a 90 day supply) can prevent cold sores from wreaking havoc on your skin. Six bottles, which is the doctor-recommended amount (180 day supply), can

"100% kill the herpes virus" while improving your immune system and skin, eliminating fatigue and insomnia, and eliminating many other herpes symptoms and side effects.

As stated before, Ben asserts that you do not need to take Blisterol forever for the recipe to work. Instead, you only need to finish one cycle to fully eradicate herpes and all of its symptoms.

Blisterol Costs

A bottle of Blisterol costs \$69 as part of a 2023 promotion. The suggested retail price per bottle of Blisterol is \$99. When buying numerous bottles of Blisterol at once, you may save even more.

How pricing works now when purchasing Blisterol online:

- 1 Bottle: \$69 + Shipping
- 3 Bottles: \$177 + Free Shipping in the U.S.
- Six Bottles: \$294 with Free U.S. Delivery

Each container of Blisterol has a 30-day supply, or 30 servings (30 capsules). Daily use of one pill eradicates herpes. The six-bottle container of Blisterol is labeled "doctor advised," indicating that at least one doctor has endorsed its use for herpes.

Blisterol Refund Policy

Blisterol comes with a sixty-day money-back guarantee. If you're unsatisfied with your purchase for any reason, you may request a full refund within 60 days with no questions asked.

The Blisterol

Ben Waller, a physician who graduated from medical school at the University of California, San Diego, invented Blisterol. Prior to developing Blisterol, Ben worked at a famous Hollywood herpes clinic.

Ben collaborated with "a team of scientists" to create Blisterol as the ultimate herpes treatment.
